

**REMARKS****Response to Restriction Requirement under 35 U.S.C. §§121 and 372**

Claims 1-28 are pending in this application and have been subjected to election of an invention group and a single disclosed catalyst for prosecution on the merits under 35 U.S.C. §121 and §372. In the Examiner's opinion, as set forth in the Detailed Action, the application contains claims directed to two patentably distinct inventions as follows:

**Group I:** Claims 1-16, drawn to a method for preparing an ester condensate; and

**Group II:** Claims 17-28, drawn to a catalyst for preparing an ester condensate.

In response to the Restriction Requirement, the applicants **provisionally elect** **Group II**, including claims 17-28, drawn to a catalyst for preparing an ester condensate.

Furthermore, the Examiner is of the opinion that the application contains claims directed to more than one catalyst. According to the Examiner, the election of a catalyst would not constitute an election of species.

The catalyst of the claimed invention can be combined as follows:

- A.** a zirconium (IV) compound and iron compound (Claims 17-19 and 22-28);
- B.** a zirconium (IV) compound and gallium compound (Claims 17-19 and 22-28);
- C.** a hafnium (IV) compound and iron compound (Claims 17 and 20-28); and
- D.** a hafnium (IV) compound and gallium compound (Claims 17 and 20-28).

The applicants provisionally elect a catalyst comprising a zirconium (IV) compound and an iron compound (**Catalyst A**). Claims 17-19 and 22-28 of **Group II** encompass the elected catalyst composition.

**CONCLUSION**

Based on the foregoing amendments and remarks, the applicants respectfully request allowance of this application.
